Welcome to the age of connected cars. In just a tap, you can evolve to a connected lifestyle. The Next Generation of Suzuki Connect devices give you absolute control of your car. You can easily download the App for your Smartphone, available on both App Store and Play Store. From Remote Vehicle Operations to Vehicle Alerts & Notifications. From Safety & Security features, to Trips & Location Data. Stay connected to your car, family and your loved ones 24X7.

Safety & Security Alerts

Suzuki Connect sends you an array of alerts to make sure you are always at peace when it comes to the safety and security of your loved ones.
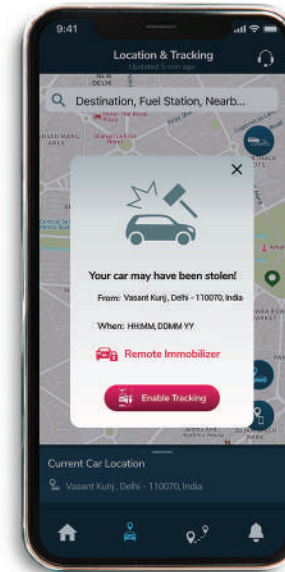

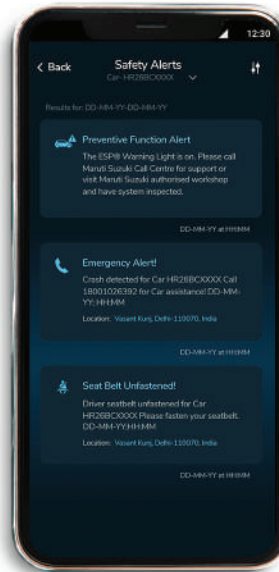

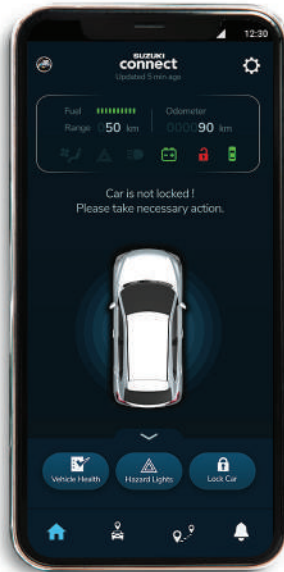

Emergency Alert:
In case of Airbag Deployment & depending on your mobile network availability, the system would notify you and your emergency contacts with the location of the incident.

Breakdown Call:
The App instantly sends you a notification in case of any malfunction triggered in vehicle along with the reason for the warning and suggested actions.

Door Lock:
In situations where you aren't sure whether you have locked the door of your car or not. The live status of door's locking condition on the App would keep you assured of your vehicle's safety.

Stolen Vehicle Alert:
If someone tries to break into your car, the Anti-theft Alarm gets activated alerting people near the vehicle and an immediate notification along with the location is sent to the user and preset emergency contacts.

Stolen Vehicle Tracking
Once the user receives stolen vehicle alert, the movement of the car can be easily tracked on the map through the App.*

*Features may vary as per models and variants.

Safety & Security Alerts
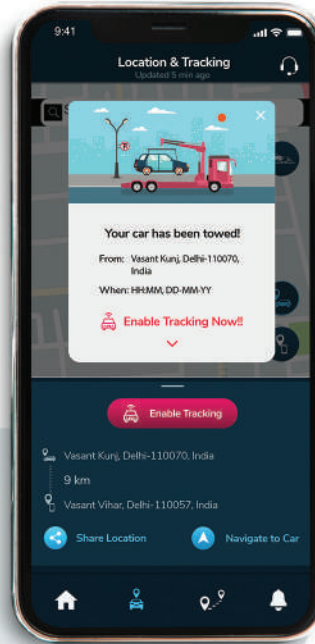

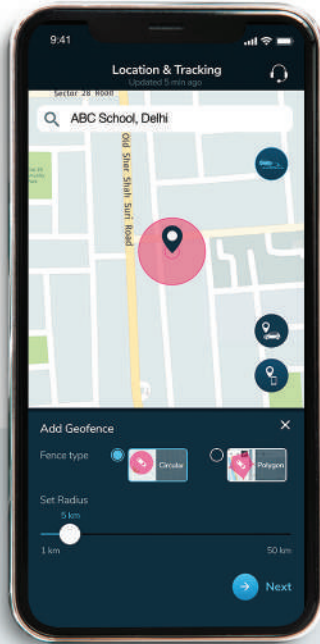

Geofence:
Set a virtual boundary (circular/polygonal) for your car. You can set 5 such areas at any point of time. And when your car enters or exits the selected area, you get an instant alert.

Safe Time Alert:
Set a monitoring time window. For any status change/activity detected on car during the monitoring window, you will be notified and will also be able to track the car*.

Valet Alert:
Stay worry free when you hand your car's keys to the valet. Monitor your car easily with the App. And if the valet breaches any of the preset conditions [leaves the driving boundary/ exceeds the defined speed/AC idling more than 10 minutes], an alert gets activated*.

Tow Away Alert:
You and your emergency contacts will get an alert on the phone if your car has been Towed-away from its last parking place, in ignition off.
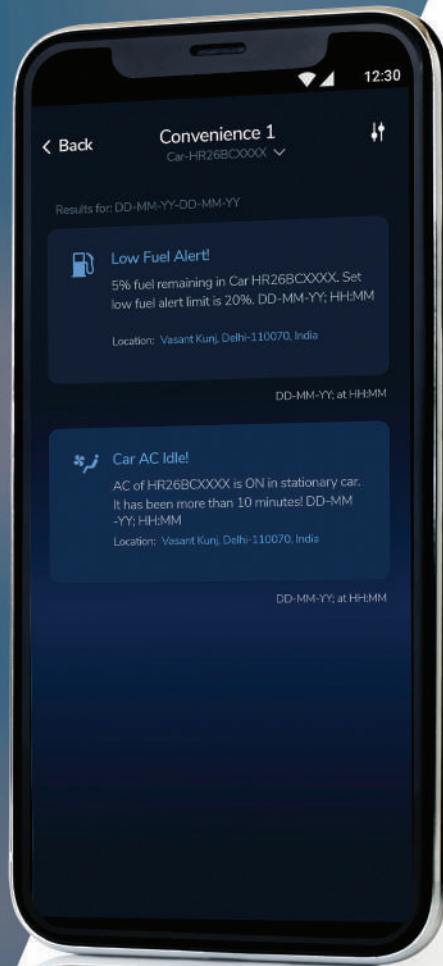

Tow Away Tracking:
Once you receive the tow away alert, you can track your vehicle's movement easily on the map*.

*Features may vary as per models and variants.

Vehicle Status & Alerts

Suzuki Connect sends you various alerts to keep you updated about your vehicle's status.

Fuel Level:
Live status of fuel level can be checked on the App.

Odometer Reading:
You can easily access the odometer value on the App.

Hazard Lights:
Get to know the status of the hazard lights* from the App itself.

Driving Range:
The App displays current driving range of your car. *

AC:
The on/off status of the AC can also be checked on the App.

Headlamp:
Check the App to know whether the headlamps of your car are turned on/off. *

Battery Status:
App displays battery health status as ok or not ok.

Door Status:
Door open/closed status is also displayed on the App. *

Lock Status:
Get live status of door locked/ un-locked on the App. *

*Features may vary as per models and variants.
